

ST:01 TRIATHLON

Product presentation (max 100 words)

The Triathlon line is the most versatile tyre of Pirelli range, for use in Highway and Regional applications, providing higher mileage and even wear in all weather conditions. The product is performing at high level in snow grip and wet braking, while keeping superior dry and wet handling behavior.

ST:01, specifically designed for fitment of trailer axle, provides:

Safety: The new tread pattern guarantees great handling and exceptional mobility whatever the road.

Durability: The tyre features a uniform wear to reduce the maintenance and extended product life with optimized casing construction.

Comfort: The new design concept provides low noise emission and smooth driving experience.

Description of application (50-70 words)

The Triathlon is the right product for all the customers that are looking for high mileage in any condition, while ensuring high safety standard at the same time. It is the right compromise for saving operating costs.

Product Feature (50-70 words)

- Excellent uniform wear achieved through an innovative tread design with pattern geometry that changes during the tire life-cycle, keeping handling behavior and safety at the best level.
- Great resistance to lateral impact and skidding in the shoulder area thanks to lateral reinforced kerbing.
- Optimized grooves geometry to prevent stone trapping and in order to increase the resistance to lateral friction.
